

## SCANNING

Scanning can include multiple pieces of artworks within the various sizes (see chart on right) to reduce costs but must meet the following criteria to do so. Exceptions exist so it is best to discuss each project with us so that we can give you an accurate price for scanning and printing.

1. Artwork/objects must be the same height so that an accurate focus can be established.
  2. Multiple Artwork/objects to be scanned all in one scan must all be flat without warped surfaces, or in frames.
  3. Artwork/objects must have the same texture so that we can set up the lighting for the best possible scan.
- 3D objects up to approximately 8 inches in depth can be scanned.  
We have successfully scanned paintings up to 23 feet in length.
- Oversize - Call us for a custom quote for your project.

Scan price includes scan, color correction, Hi Resolution file, a JPEG, a small color corrected proof print on paper or canvas, and an archived file at Heartland Printworks. Client can also bring a USB Flash Drive for files.

All scans are color corrected by hand using the original work for reference.

USB Flash Drive with files are - \$25.00 each.

## PRINTING

Printing on fine art paper is 15 cents a square inch and is based on the image area. Up to 2 inch borders are included at no cost. Larger borders will be charged at the 15 cents a square inch price.

This price includes the choice of house stock of archival paper or canvas.

Canvas is available in semi gloss with a UV protective coating. Sufficient borders are included for stretching. Canvas printing is .25 a square inch.

Specialty papers can be had for an additional cost.

Formulas for printing prices are:

$W \times H \times .15 =$  fine art paper cost  
 $W \times H \times .25 =$  Canvas

Minimum print charge- Prints under 8 x 10 inches have a base charge of \$10.00 each.
